### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, with respect to independent claim 1, none of the prior art alone or in combination disclose or teach of a zoom lens system comprising at least three lens groups wherein zooming is performed by moving at least two lens groups as claimed, specifically wherein a first and a second lens group comprise focus-adjusting lens groups that are movable in the optical-axis direction in order not to move a position of an image plane upon zooming and satisfies the claimed condition regarding the focus sensitivities of said first and second lens groups.

Specifically, with respect to independent claim 4, none of the prior art alone or in combination disclose or teach of a focus-adjustment method of a zoom lens system comprising at least three lens groups wherein zooming is performed by moving at least two lens groups as claimed, specifically wherein the method comprises providing a first and a second lens group as focus-adjusting lens groups, which satisfy the claimed condition regarding the focus sensitivities of said first and second lens groups.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### CONCLUSION

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ito (U.S. 4,978,204) is being cited herein to show a zoom lens system comprising some of the structural limitations of that of the claimed invention but does not specifically satisfy the claimed condition regarding the focus sensitivities of the first and second lens groups.
